			MAIL DATE 09/11/2007	DELIVERY MODE PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/714,018

Applicant(s)

PIZZOLI ET AL.

Examiner

Phillip H. Nguyen

Art Unit

2191

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 28 March 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-20 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-20 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. This action is in response to the amendment filed 3/28/2007.
2. Claims 1-2,10-11 and 19-20 have been amended.
3. Claims 1-20 remain pending and have been considered below.

Response to Arguments

4. Applicant's arguments, see pages 8-9 of the amendment, filed 8/13/2007, with respect to claims 1, 10, 19 and the specification have been fully considered and are persuasive. The rejection of 35 USC § 112 of claims 1, 10, 19 and the specification has been withdrawn.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Regarding Claims 1, 10 and 19 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The newly added limitation "without intercepting the

application at run-time" raises a question as to whether the invention can be carried out without intercepting the application at runtime. Although, applicant's specification mentions without intercepting the application at runtime but does not explicitly disclose how this process works.

Regarding Claims 1, 10 and 19 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification does not provide any definition or written description to explicitly describe the newly added material "without intercepting the application at run-time" and how this process works.

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Regarding claims 1, 10 and 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. For example, claim 1 recites a runtime system that intercepting a call. Claim 2 further clarifies the translation process is performed at runtime. However, the newly added limitation "without intercepting the application at run-time" raises a question as to whether this system is performed at runtime or not. First, if this system is a runtime system and the message translation is a runtime module then "without intercepting the application at run-time" is contradicting

Art Unit: 2191

with the runtime system as recited in the preamble. Second, at runtime, when intercepting a call to a function on the application, the application is being intercepted at runtime. For examining purposes, examiner interprets that the application is being intercepted at runtime.

Claim Rejections - 35 USC § 101

7. The amendment filed on 8/13/2007 does not overcome the 35 USC § 101 rejection set forth to claims 19-20. Therefore, examiner maintains the rejection.

Although, applicant has amended claim 19 to recite "computer readable storage medium", however the specification provides intrinsic evidence that this "computer readable storage medium" can also include "data carrier".

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6, 8-15, and 17-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Halviatti et al (Patent Number: 5,475,843).

Art Unit: 2191

As per claims 1, 10 and 19:

Halviatti discloses:

- automation script means for receiving an automation script for automating use of the user interface in an application ("**sends appropriate script scenes to the Script Engine**" col. 10, lines 36-37; **also see for example, FIG. 6, and texts which further expand their features** col. 21, lines 35-46); and
- script translation means for intercepting a call from the automation script to a function simulating a user action on the application without intercepting the application at run-time ("**Message Engine may trap each CreateWindow API call for determining each screen object which is about to be created**" col. 24, lines 33-35), retrieving a translated text string associated with the function call ("**retrieved by a call to GetMessage(...)**" col. 7, lines 55-62), and calling the function simulating the user action with the translated text string ("**class methods are provided for simulating user events. For instance, the Click(), DbClick()...**" col. 33, lines 25-30; "**user interaction simulation, and Resource tracking**" col. 34, line 16; "**Each GEM can simulate any possible operation that a user would perform on any given element...**" col. 35, lines 38-44).

As per claims 2, 11 and 20:

Halviatti discloses:

- message translation means for supplying translated text for the automation script's run time execution ("**TranslateMessage()**" col. 7, line 64; "**ATUs**

Art Unit: 2191

translate low-level messages into high-level messages” col. 22, lines 39-40);

and

- selective text locator means (**“GetMessage()” – a message is retrieved by a call to GetMessage()” col. 7, line 61; retrieving a message/text is the same as locating a message/text)** coupled to the message translation means for selectively supplying appropriate text to the automation script’s run time execution depending on the function call (**“the retrieved message may be translated by a call to TranslateMessage” col. 7, lines 63-64).**

As per claims 3 and 12:

Halviatti discloses:

- wherein the selective text locator means is arranged to selectively supply appropriate text to the automation script’s run time execution depending on a resource ID of the function call (**“an unique id is constructed for this top level menu...the resource database is search for the record under this id...the tope level menu string from the menu handle is retrieved...a preferred name is also retrieved...” col. 37, lines 4-10).**

As per claims 4 and 13:

Halviatti discloses:

- a library (**“GEM Library” col. 31, line 21, a collection of GEMs)** including a function having the same signature as the function call and which is arranged to

retrieve the translated text string before the function call (**"a GEM encapsulates the behavior of irreducible user interface elements such as push buttons, checkboxes, listboxes, menu items...when GEM is instantiated, it takes two parameters...the GEM can be instructed to run a self test method by simple comparing its expected attributes against its actual attributes (retrieved from the actual element on the screen which the GEM represents)"** col. 31, line 60 – col. 32, lines 1-60); and

- one of a file (**"a GEM"** col. 31, line 43) referencing the library (**"when a GEM instantiated, it takes two parameters: a reference to its parent and..."** col. 31, lines 52-44; **a GEM is also considered as a file or a program, it references to its parent, a library**), the automation script being arranged to reference the file and the library (**"Upon invocation of a test script, the Test Runtime Library is loaded, the resource database is opened and initialized the GEM library classes are loaded..."** col. 41, lines 15-20; which means, when the a test script is being tested, the GEM library classes gets called), and the library including the retrieval function (**"self test method is comparing its expected attributes against its actual attributes (retrieved from the actual element on the screen which the GEM represents)"** col. 31, lines 51-55) and the function call (**"a GEM ... a reference to its parent"** col. 31, lines 43-44, **a call to its parent**) , the library being arranged to be called by the automation script (**"Upon invocation of a test script, the Test Runtime Library is loaded, the resource database is opened and initialized the GEM library**

classes are loaded...” col. 41, lines 15-20; which means, when the a test script is being tested, the GEM library classes get called).

As per claims 5 and 14:

Halviatti discloses:

- wherein the file referencing the library comprises an include file (“**Appendix E: Window Proxy**” col. 49).

As per claims 6 and 15:

Halviatti discloses:

- wherein the library including the retrieved function and the function call has the same name as a library containing the function called by the automation script (“**GEM Library**” col. 31, line 21; **GEM Library including retrieved function and function call disclosed above and is called by automation script upon invocation of a test script**).

As per claims 8 and 17:

Halviatti discloses:

- wherein the automation script is in the English language and the application is arranged to use a non-English language (“**a lingua franca or common language for all events**” col. 9, lines 20-22).

Art Unit: 2191

As per claims 9 and 18:

Halviatti discloses:

- wherein the user interface comprises a graphical user interface (**FIG. 1, and text, which further expand their features**, col. 5, line 51).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 7 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Halviatti et al. (Patent Number: 5,475,843), in view of Laane (Patent No.: US 6,978,445 B2).

As per claims 7 and 16:

Halviatti discloses:

- wherein the automation script comprises a Java™ script.

However Laane discloses an analogous system including Java™ script ("**Javascript**" col. 5, line 47).

Therefore, it would have been obvious to one having an ordinary skill in the art at the time the invention was made to modify Halviatti's system to include Java™ script. One

of the skilled in the art would have been motivated to modify Halviatti's system because the user select the value from the dropdown, hits Go, and the choice is made. By using Java™ script, a programmer can have the list notify him/her when a change is made, and a programmer can essentially hit that Go button for the user. This saves the use all the hassle of clicking on a button.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phillip H. Nguyen whose telephone number is (571) 270-1070. The examiner can normally be reached on Monday - Thursday 10:00 AM - 3:00 PM EST.

Art Unit: 2191

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wei Y. Zhen can be reached on (571) 272-3708. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
